

Secure Pork Supply Plan

In the Event of a Foreign Animal Disease Outbreak

What is the Secure Pork Supply (SPS) Plan?

- Provides a workable business continuity plan for sites that are under movement restrictions but *not infected* with foot and mouth disease (FMD), classical swine fever (CSF), or African swine fever (ASF)
- Offers movement guidance for producers and officials managing the outbreak
- Provides biosecurity and surveillance tools for producers

Business Continuity

Movement Guidance

Biosecurity

Surveillance

Why is the Secure Pork Supply Plan needed?

- Help sites in Control Areas whose pigs have no signs of FMD, CSF, or ASF continue to move animals
- Limit carcass disposal problems and lost income for sites, haulers, processors, and grocers
- Maintain the supply of pork and pork products to consumers because FMD, CSF, or ASF are not a public health or food safety concern

How can you voluntarily participate in the Secure Pork Supply Plan?

- Contact your State Animal Health Official to request a Premises Identification Number (PIN)
- Visit the Secure Pork Supply website www.securepork.org
- Develop your site's SPS Plan using the materials available in English and Spanish

The Secure Pork Supply Plan is primarily funded by USDA. Additional funding is provided by the Pork Checkoff.
